CHARGE UP WITH THE **EV POWER PAK**

Avcon's EV Power Pak is a cost effective Power Control Station (PCS) manufactured to provide indoor or outdoor power to your on-board EV charger.

The Box has automatic start and stop functions while containing a full self-diagnostic program prior to each use. It can be mounted to any wall or can be pedestal mounted for parking lot use.

For best possible usage, simply insert the connector into the vehicle, and everything else is automatic.

Then just remove the connector from the vehicle to stop all operations.

- *Provides up to 32 amps at 240 volts AC on a 40 amp branch circuit*
- *Complies with SAE J1772 conductive equipment*
- *Fully automatic! No buttons to push or difficult operating instructions to read*
 - *Cost effective and easy to use*
 - *Safety cord pull-away feature that prevents accidental strain*
- *Independent connector holster that can be mounted for convenient usage*
- *For indoor and outdoor applications*
- *Available with 12', 16', 21', or 25' cables*
- *Easy to install!*
- *UL listed*
